

HABITATS ARE HOMES

Different habitats support different types of animals. All animals need places to live that provide food, water, shelter and safe places to raise young.

Find an animal in the Zoo that lives*

in a desert

in a tropical rainforest

in a grassland

in freshwater

on land

in the mountains

in the ocean

in an urban area

in a temperate forest

in a wetland

BONUS! Name an adaptation that allows the animal to survive in its habitat.
