

Predator & Prey

There are nine species in the Asia section of the Zoo. Observe the animals native to Asia. Discover which animals are prey (animals that get eaten by other animals) and which are predators (animals that hunt and eat other animals).

List the prey animals that you see that are native to Asia.

List the predator animals that you see that are native to Asia.

Pick a **PREDATOR** and draw it. Be sure to label details on your drawing.

Pick a **PREY** animal and draw it. Be sure to label details on your drawing.

What adaptations and skills make your predator good at catching prey?

What adaptations and skills make your prey good at avoiding predators?
